

Modelo Regional de Previsão Climática para o Sul do Brasil (MoReClima-SUL)

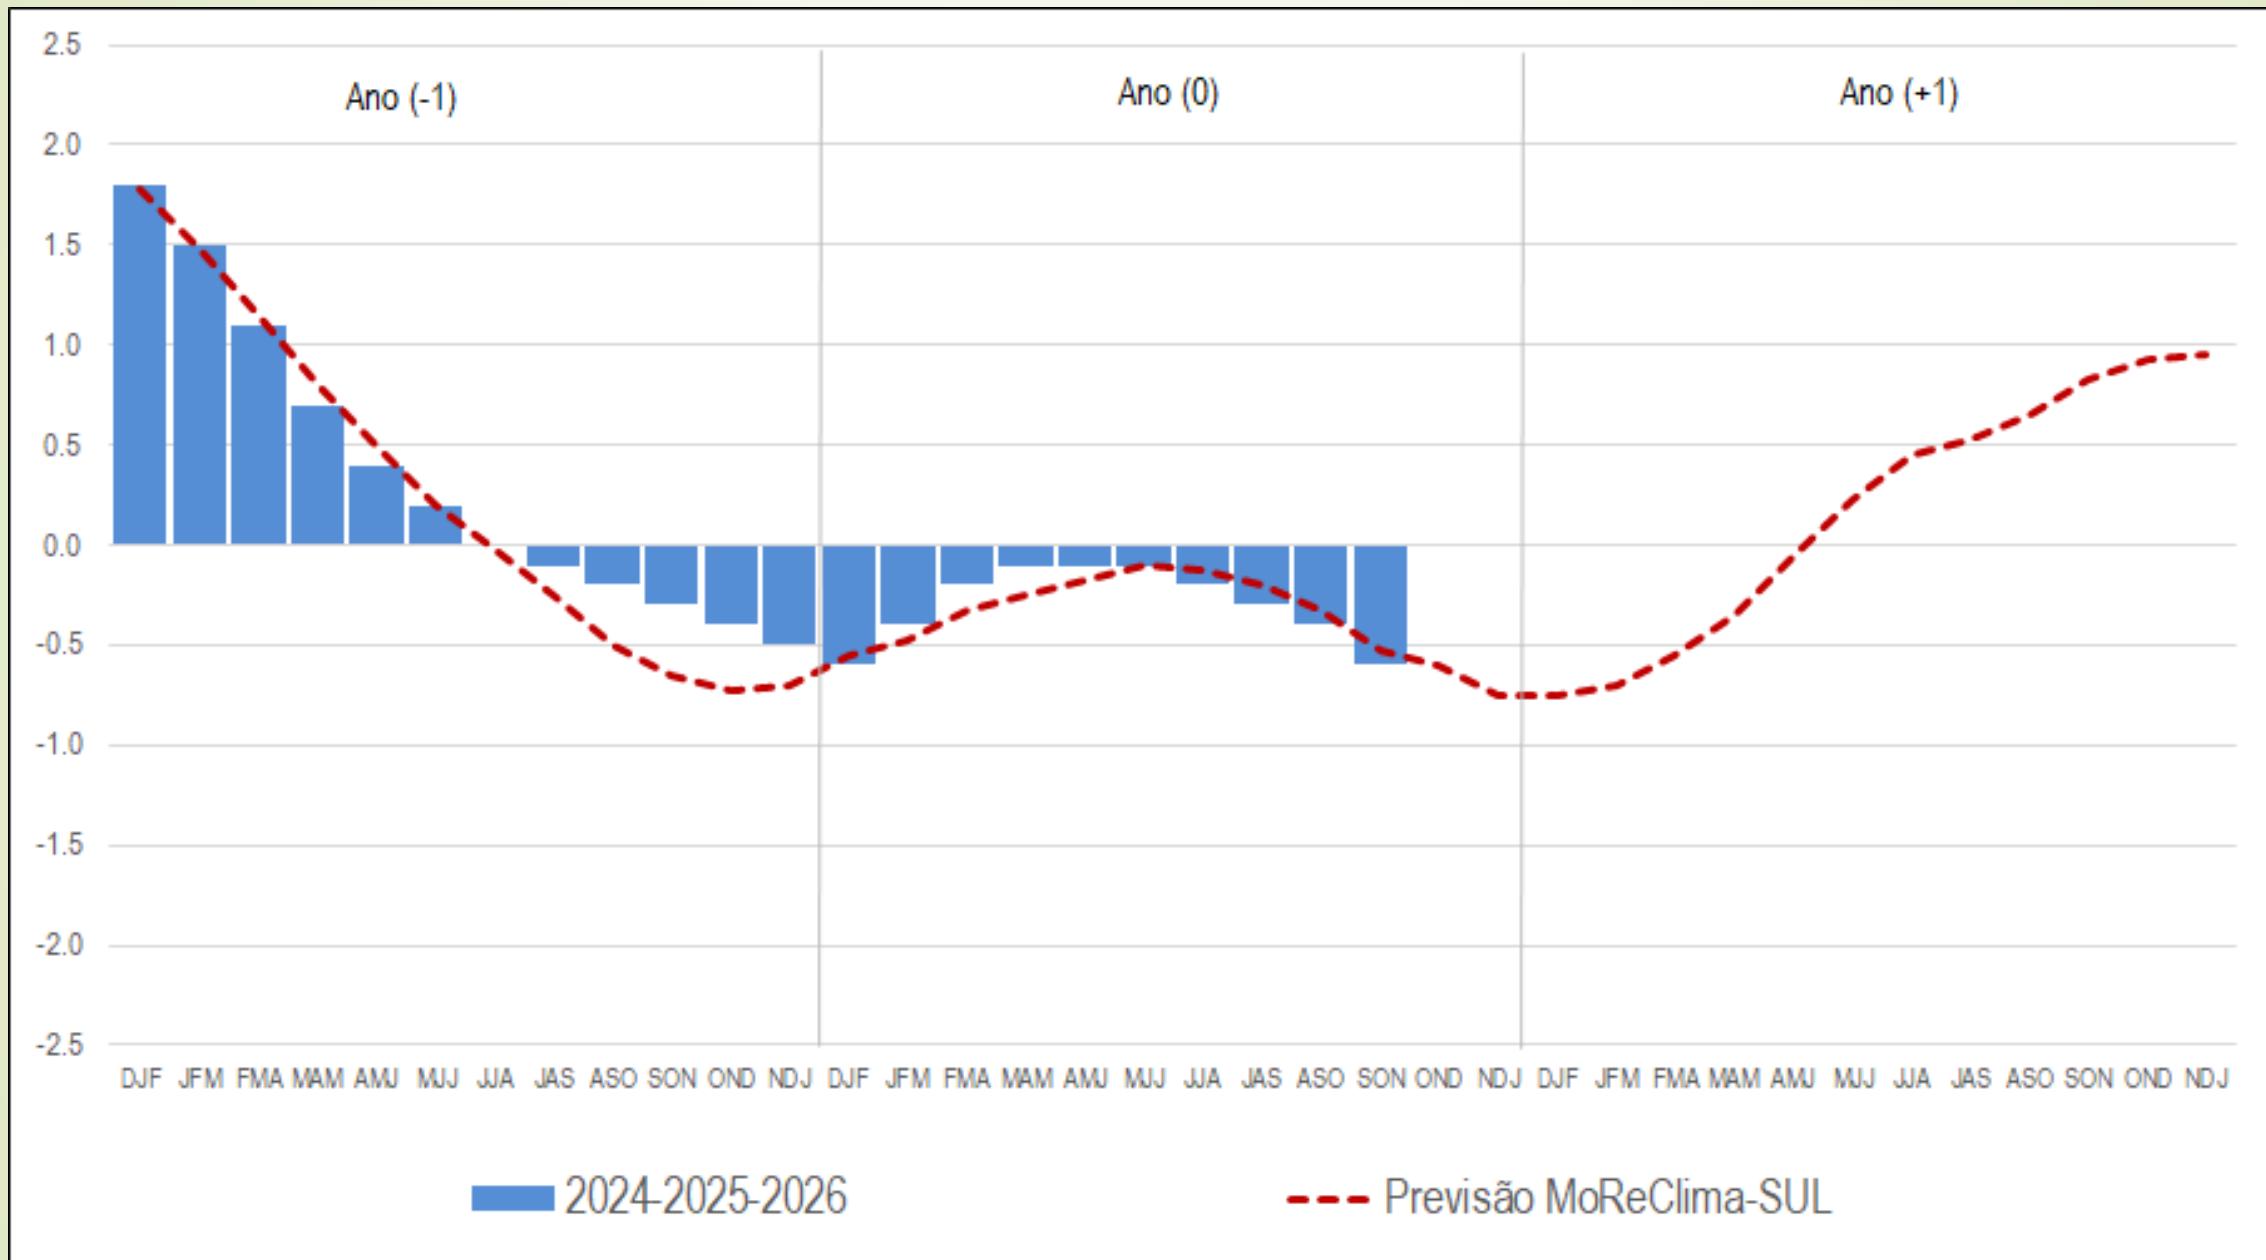

Janeiro a Março/2026

Projeto e execução: Dr. Denilson Ribeiro Viana

Supervisão: Prof. Dr. Francisco Eliseu Aquino

Apoio Técnico: MSc. Glauco Freitas

Índice ENOS/CPC – SON/2025 vs. Previsão MoReClima-SUL

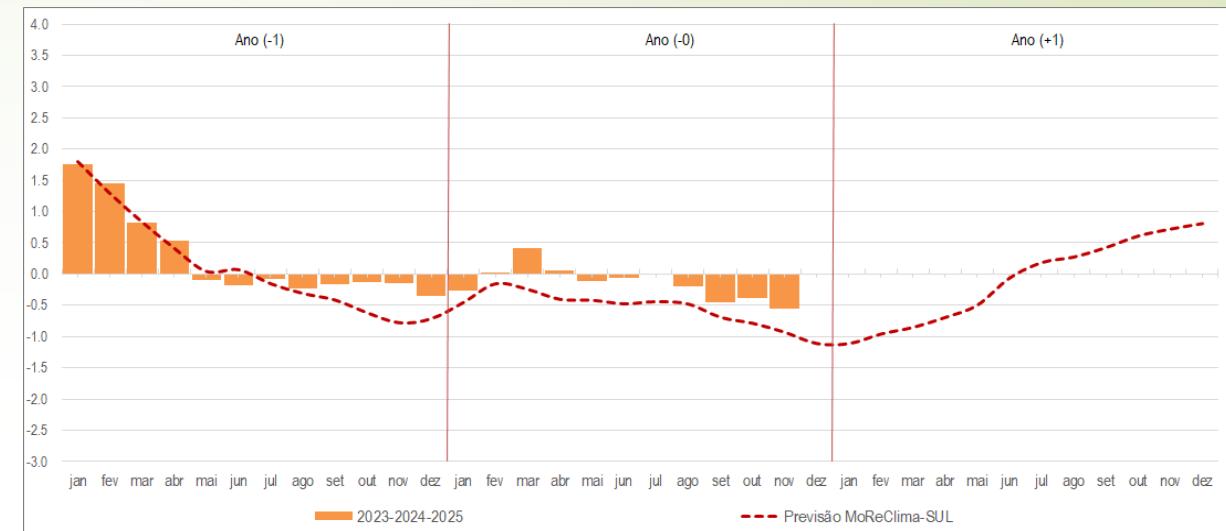

Indicadores ENOS – Novembro/2025 vs. Previsão MoReClima-SUL

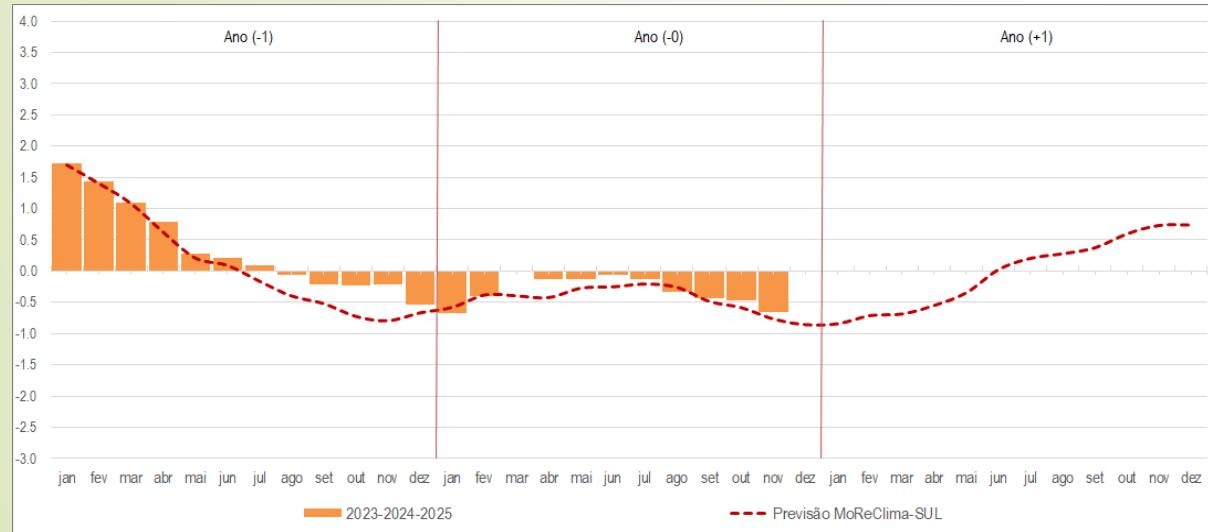

Niño 1+2

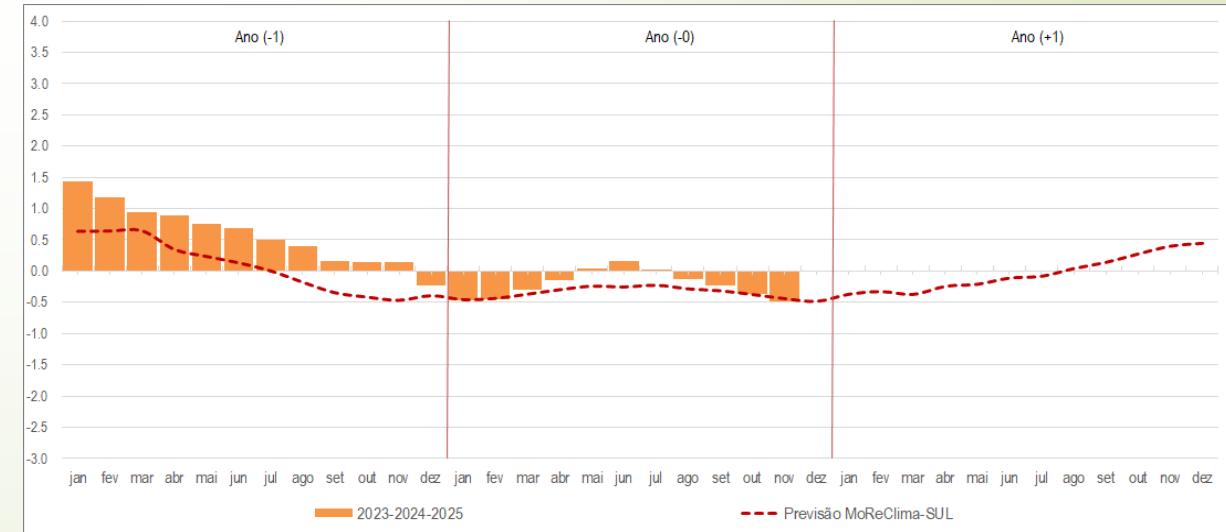

Niño 3

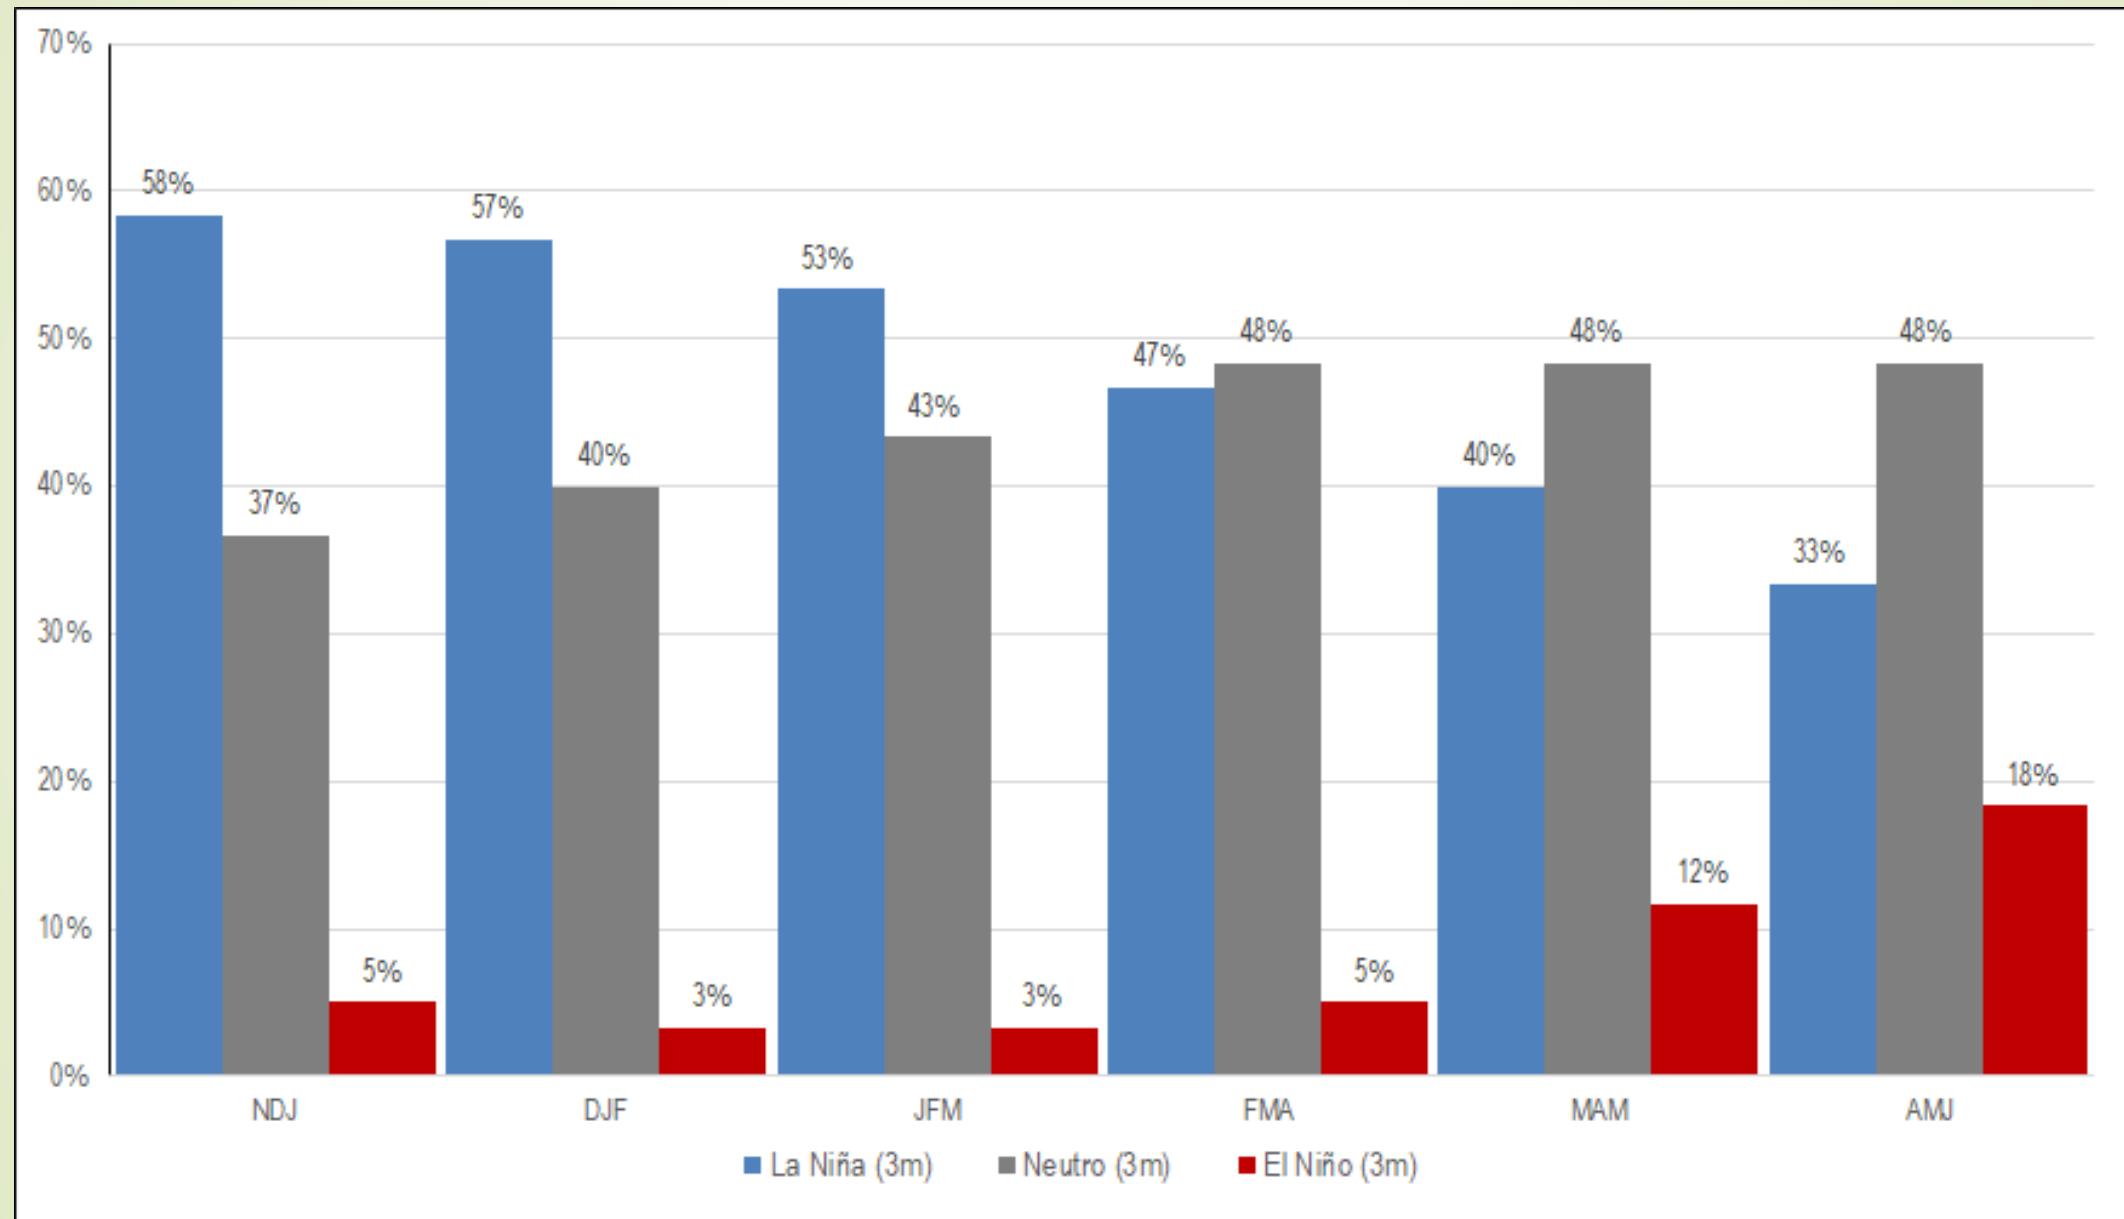

Niño 3.4

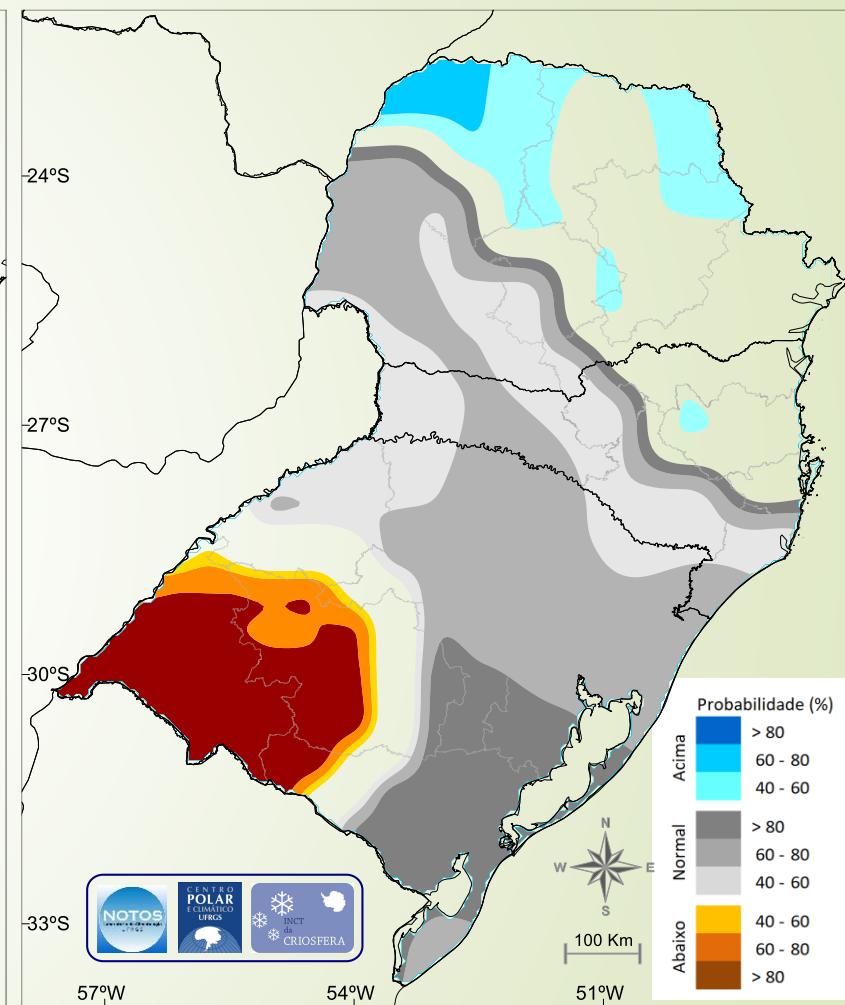

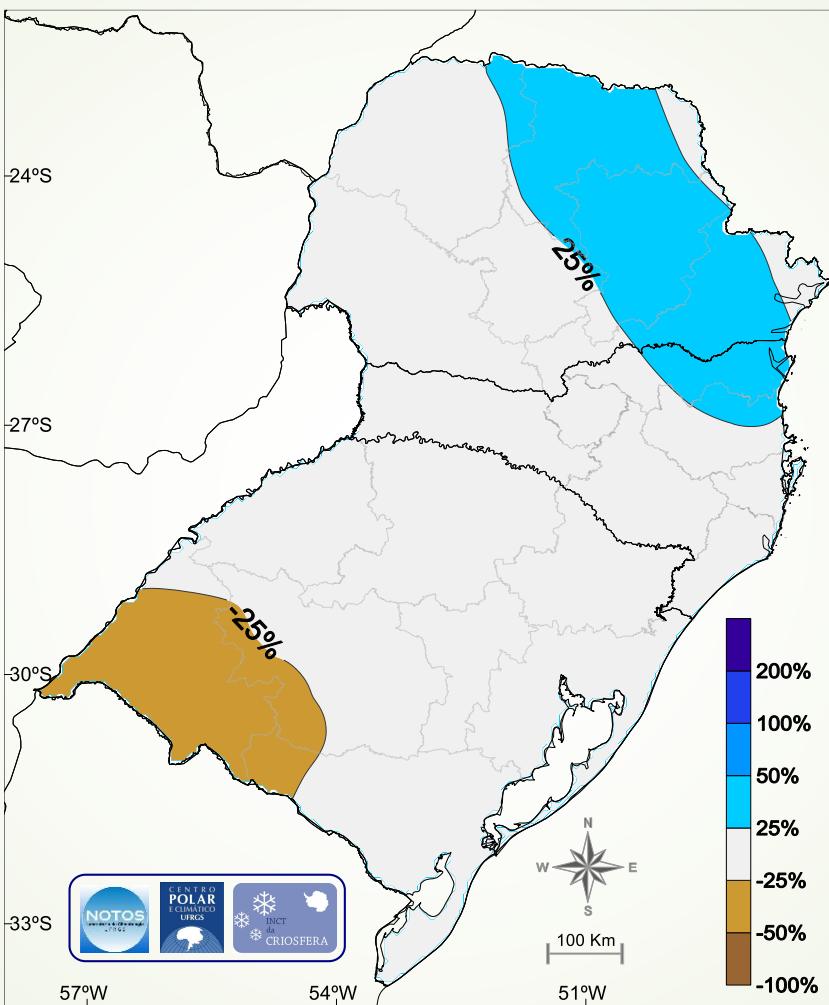

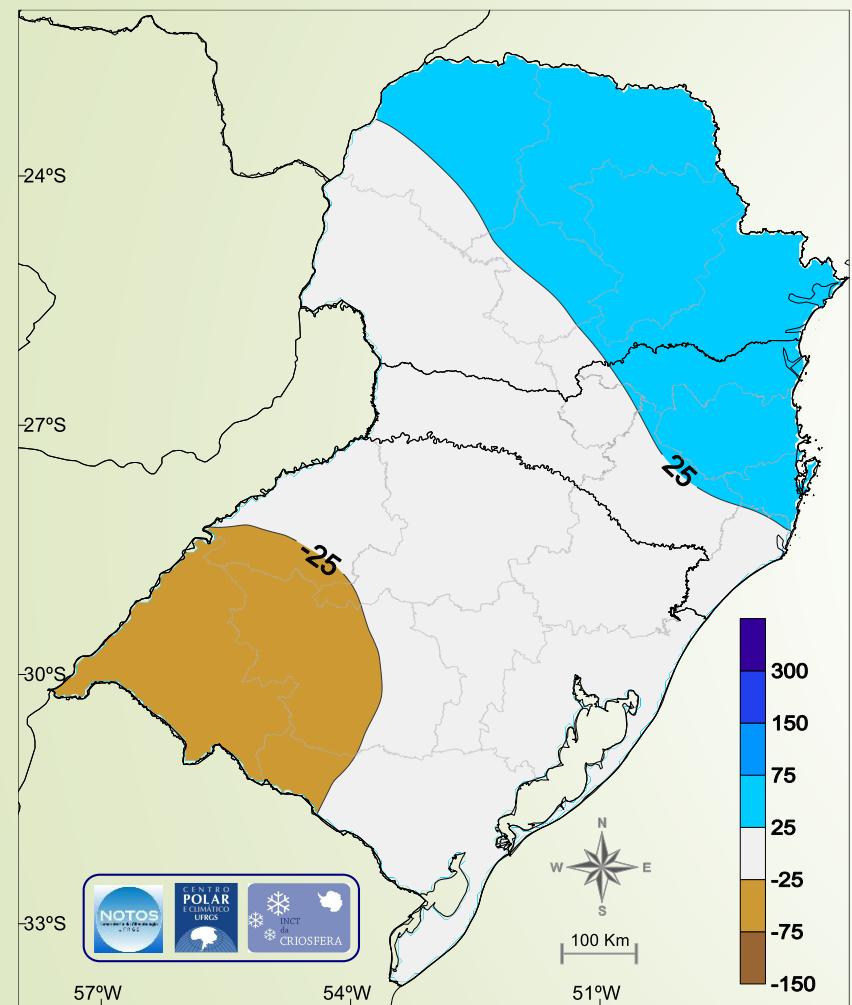

Niño 4

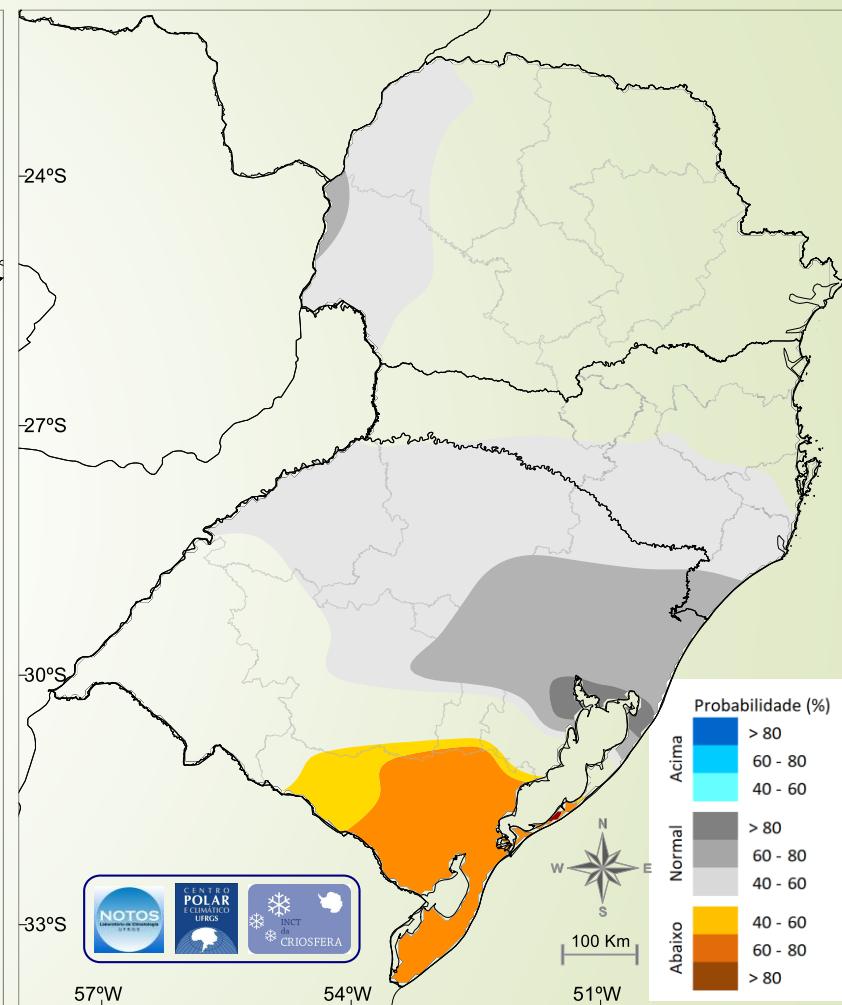

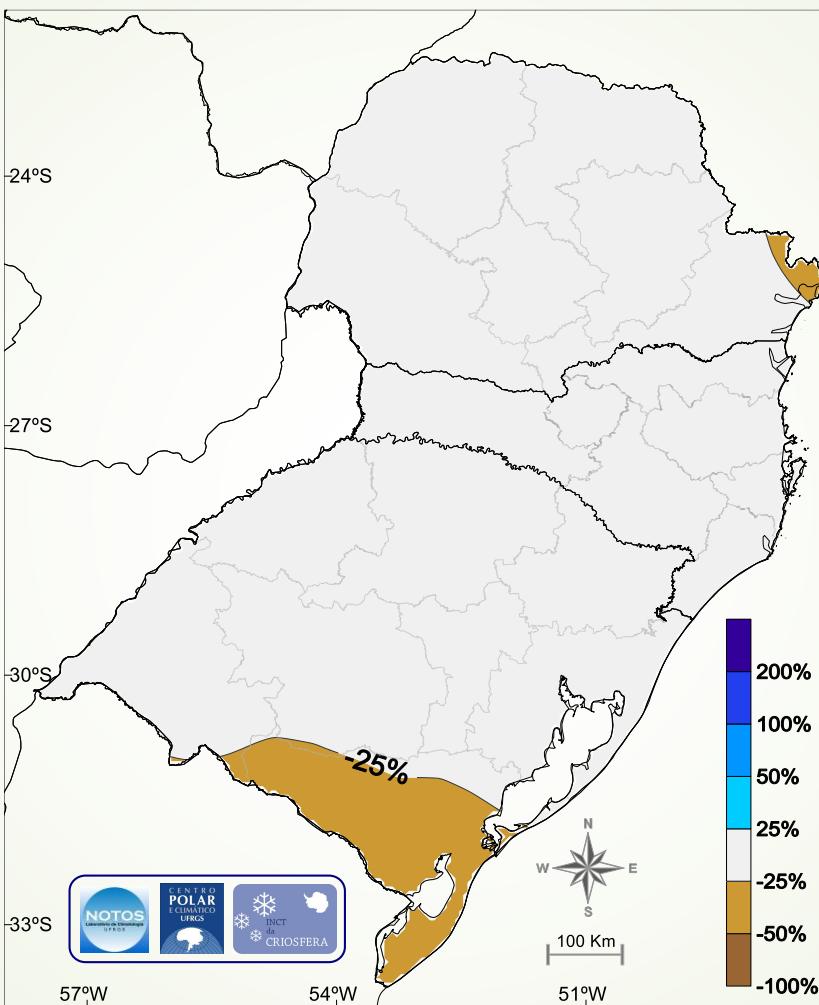

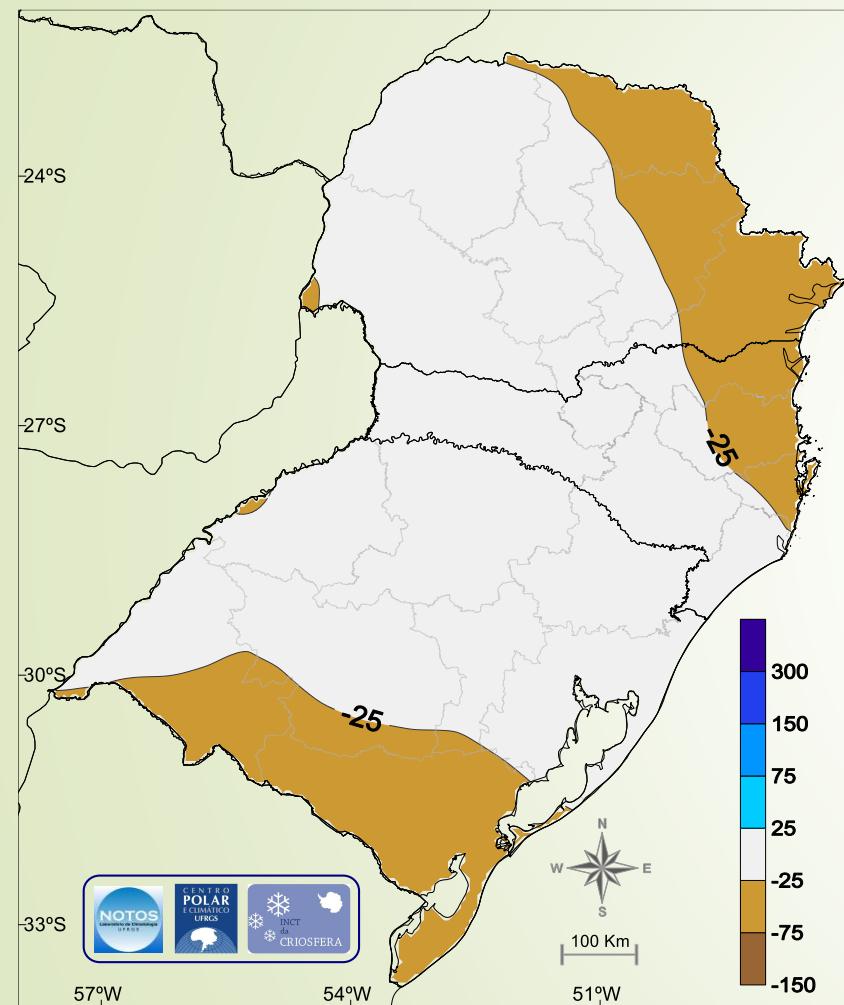

Previsão Probabilística MoReClima-SUL do ENOS 2025 – Quick Look

Previsão Climática de Precipitação – Janeiro/2026

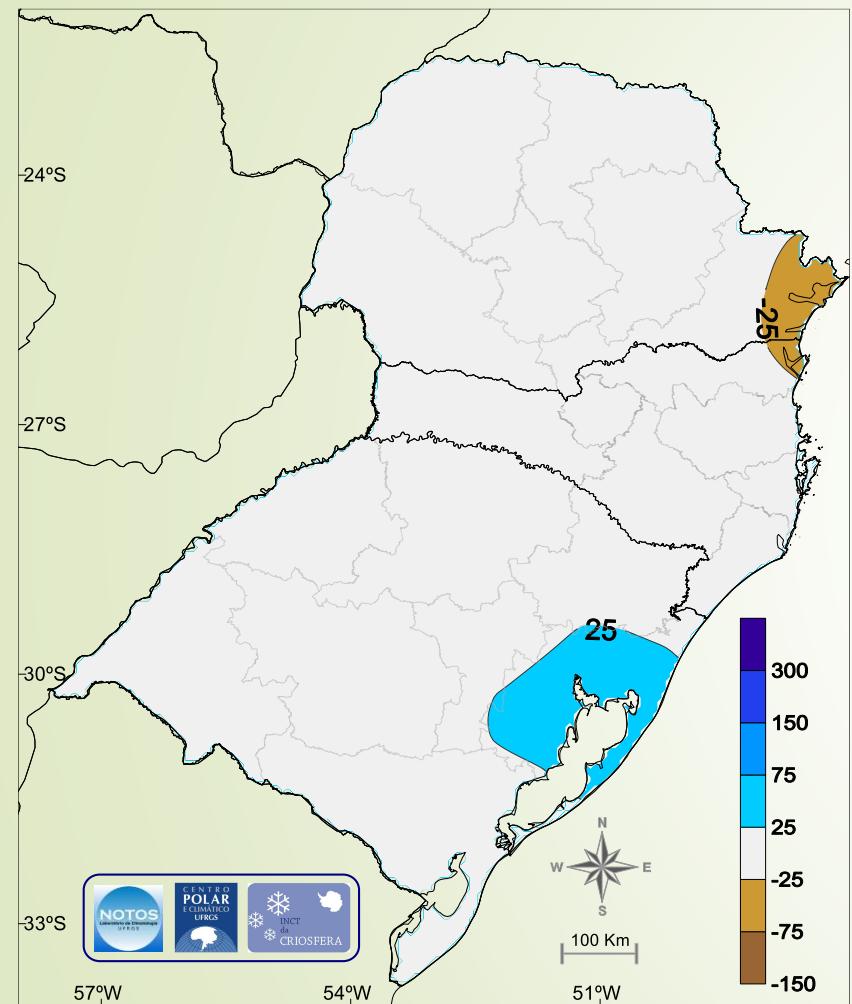

Previsão Climática de Precipitação – Fevereiro/2026

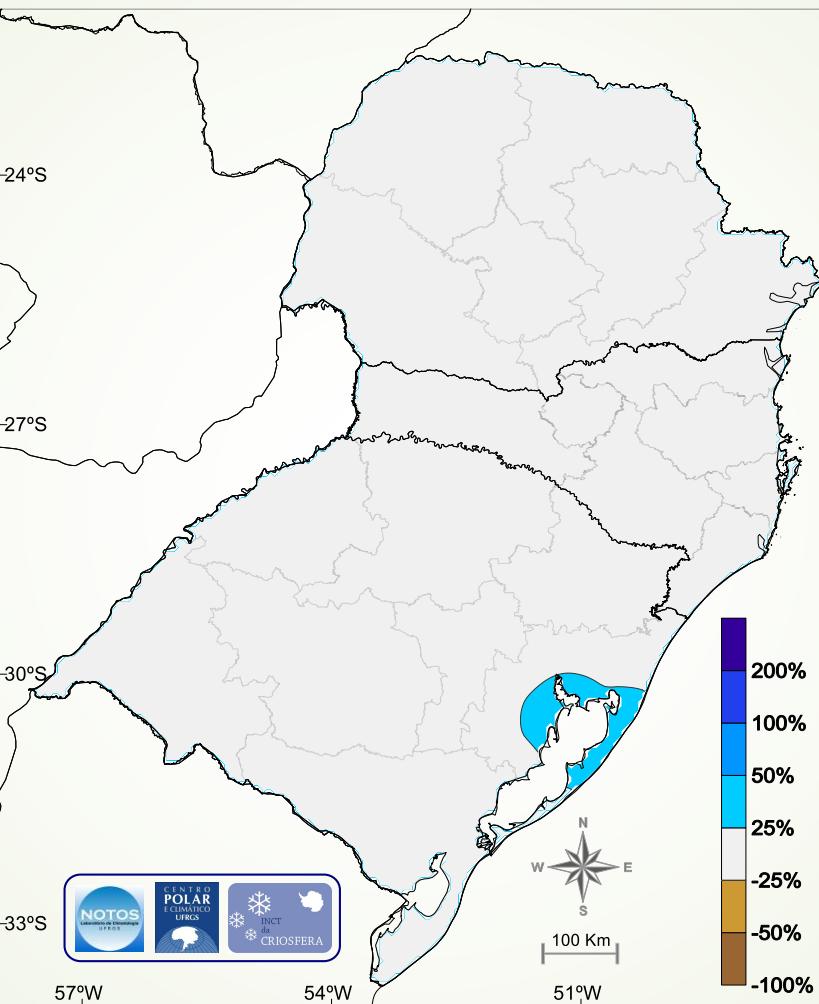

(*) área transparente: probabilidade < 40%

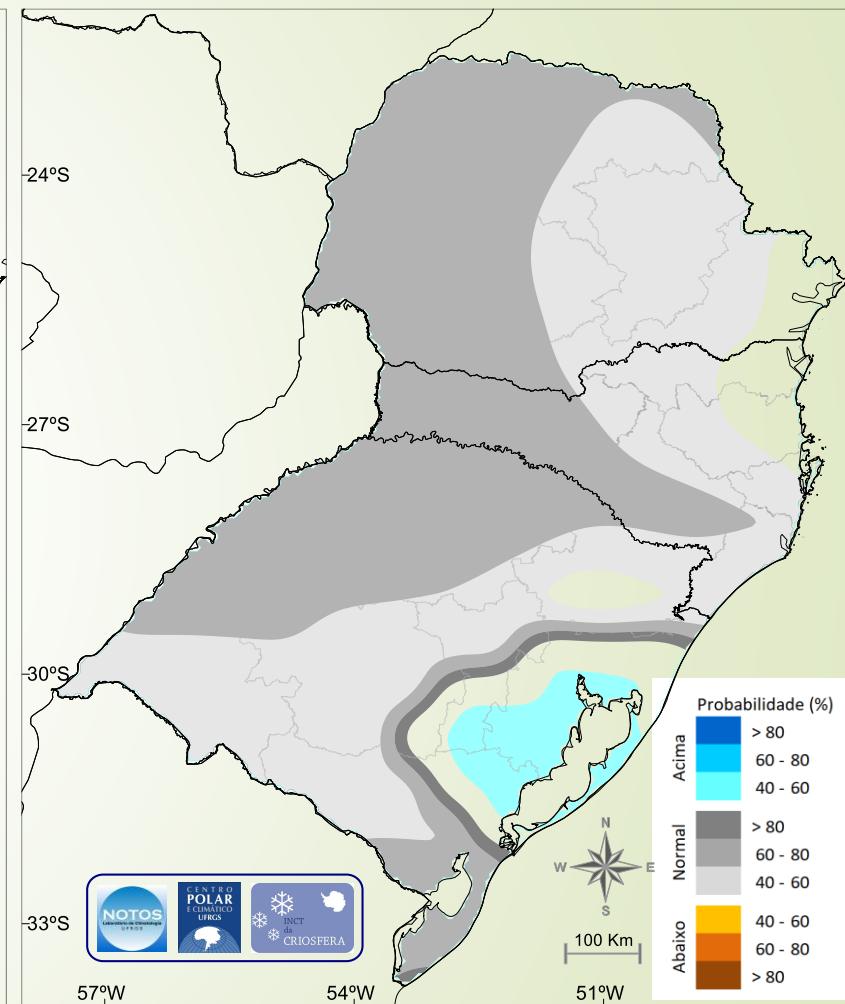

Previsão Climática de Precipitação – Março/2026

Desvio em milímetros (mm)
(Climatologia GPCC – 1981-2010)

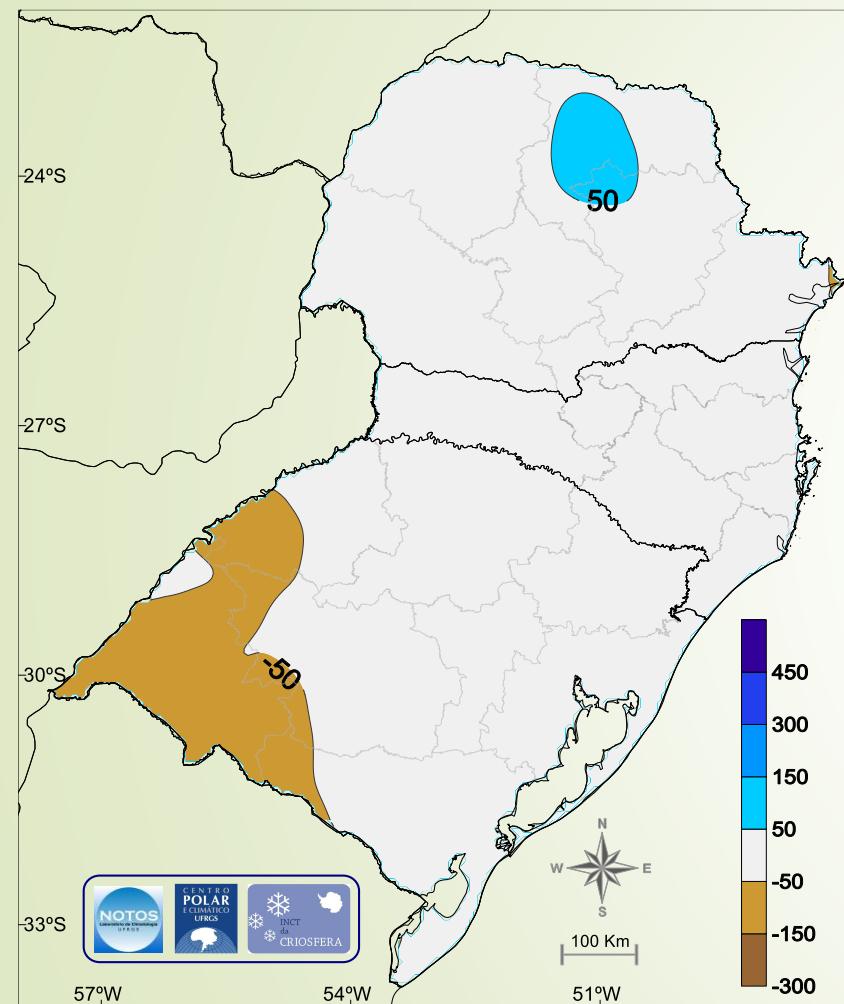

Desvio em percentual (%)
(Climatologia GPCC – 1981-2010)

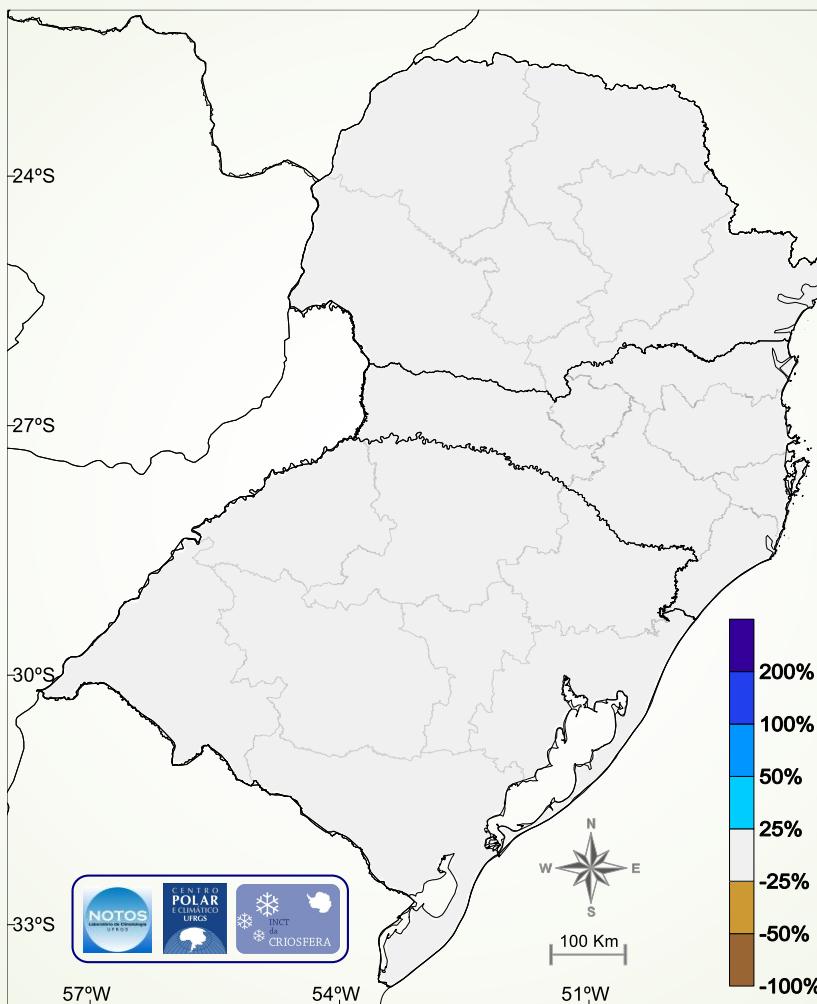

Categorias e Probabilidade (%)
(Climatologia GPCC – 1981-2010)
(*) área transparente: probabilidade < 40%

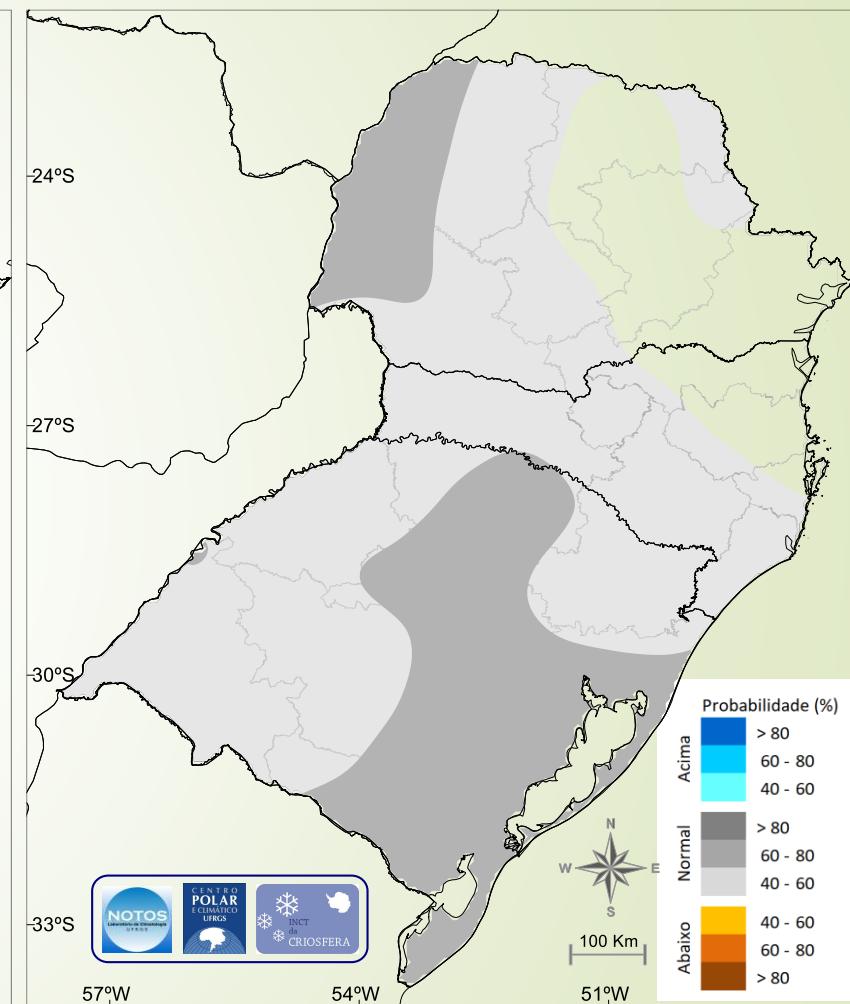

Previsão Climática de Precipitação – JFM/2026

Desvio em milímetros (mm)
(Climatologia GPCC – 1981-2010)

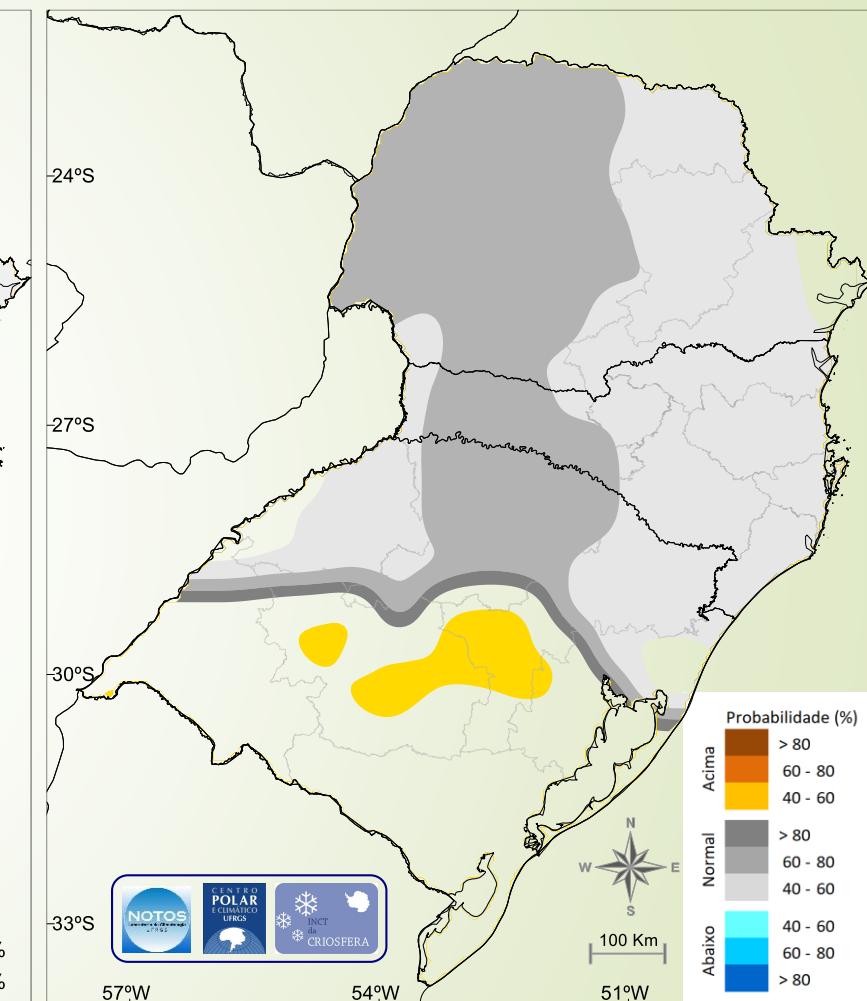

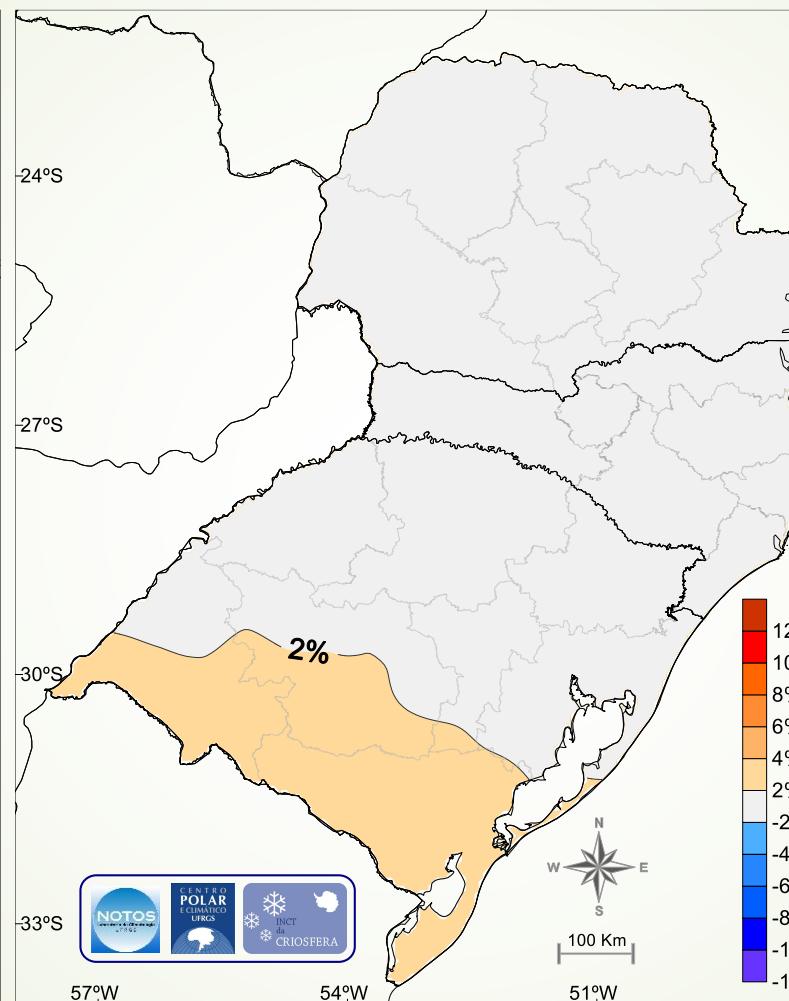

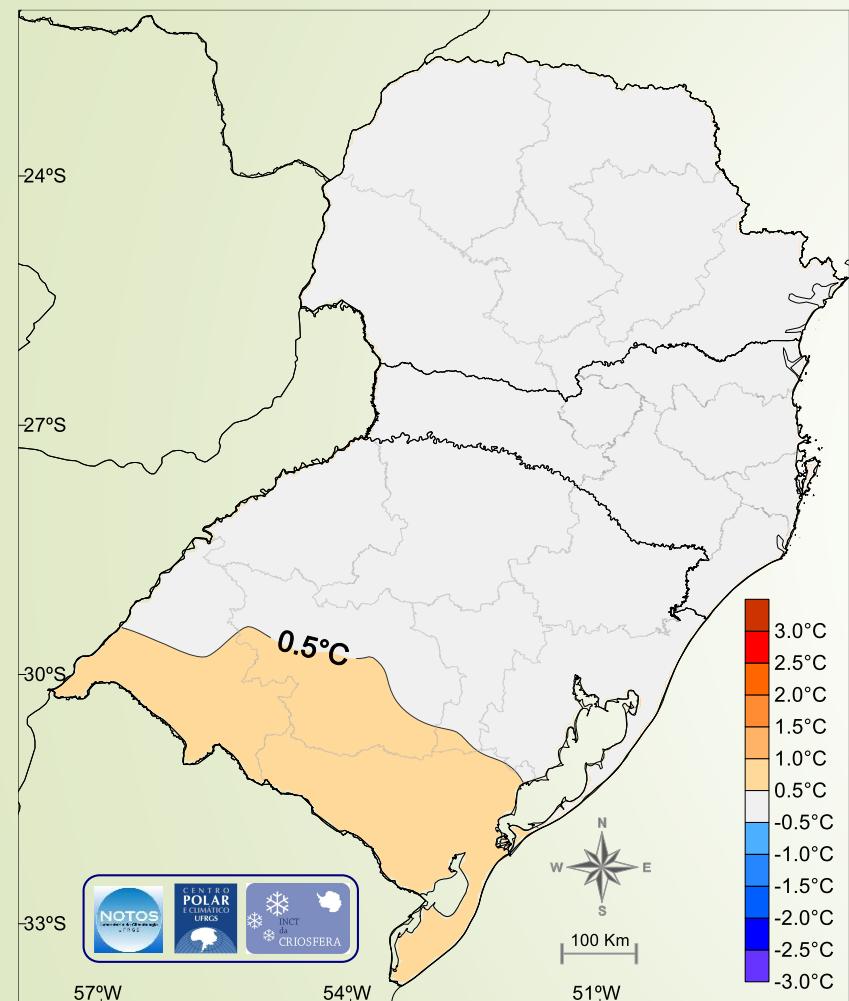

Desvio em percentual (%)
(Climatologia GPCC – 1981-2010)

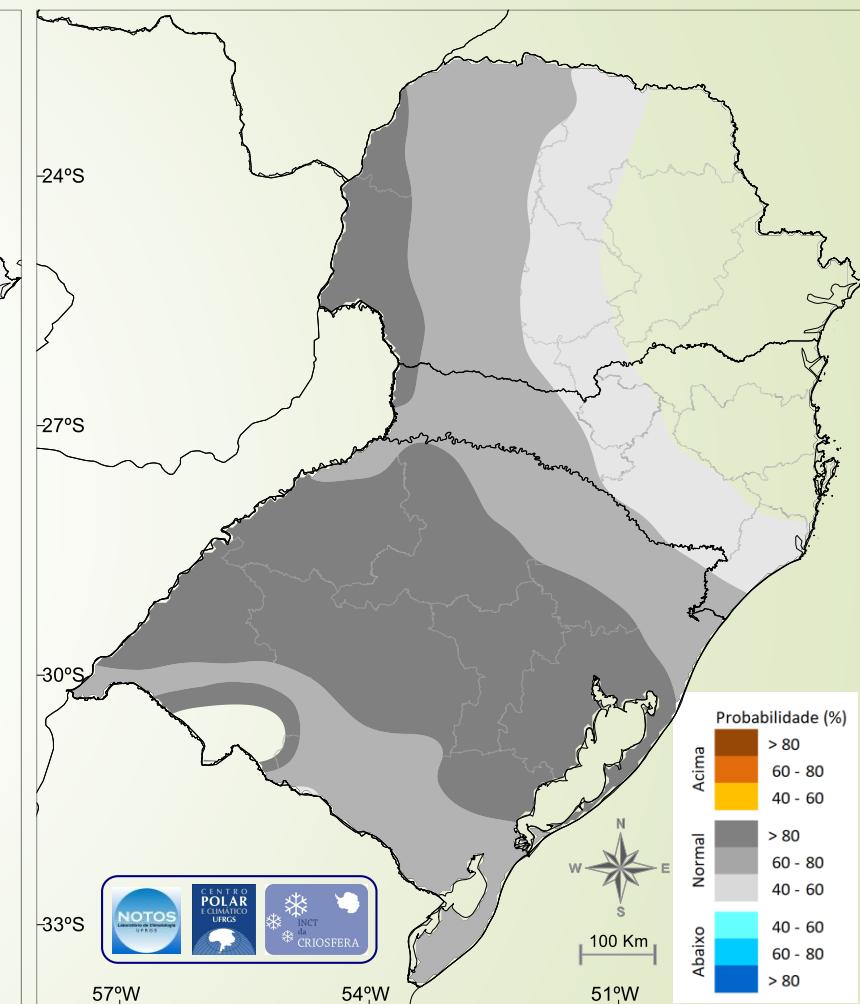

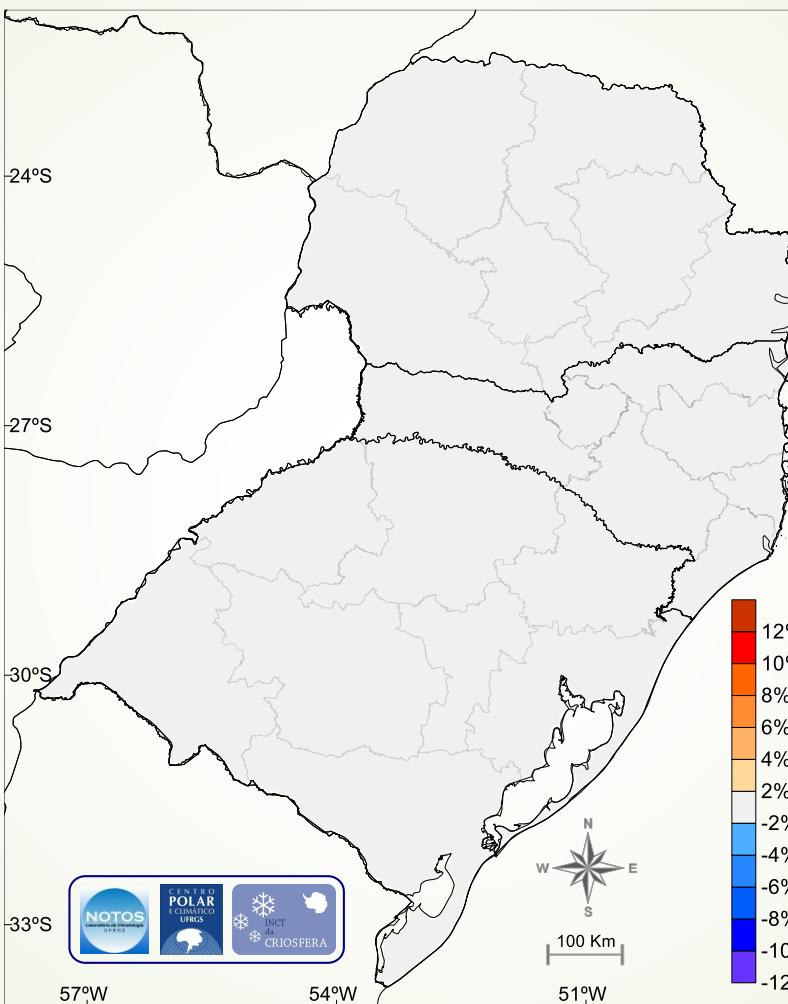

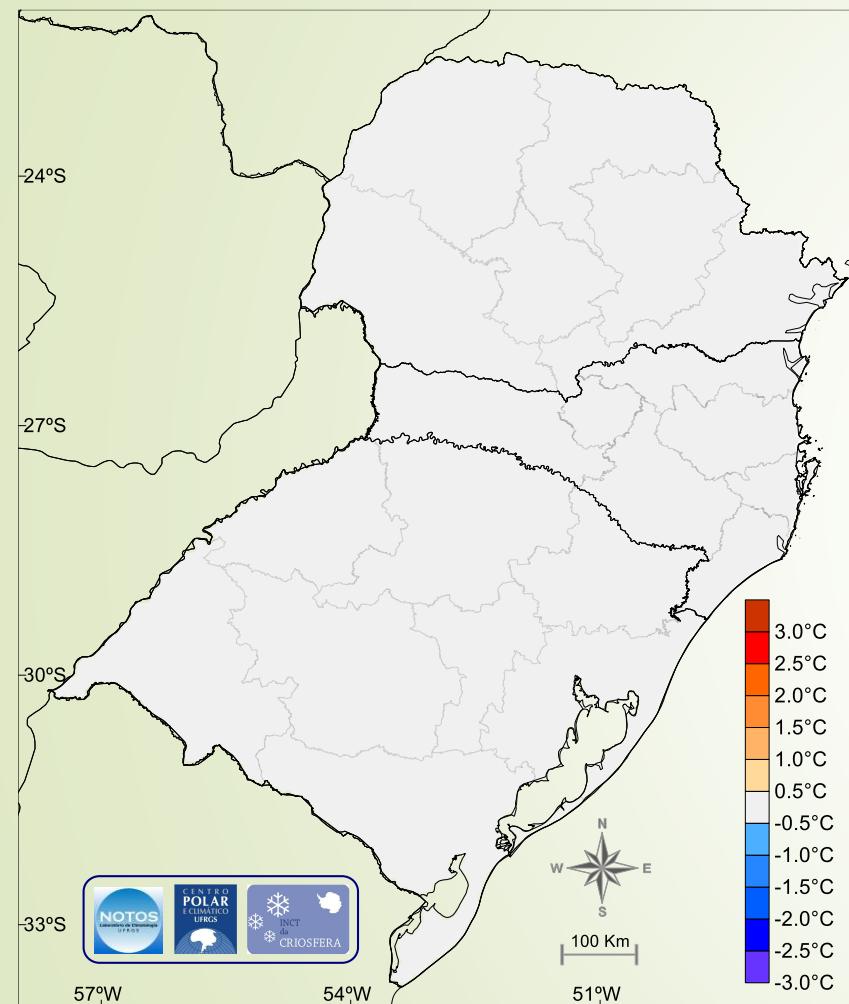

Categorias e Probabilidade (%)
(Climatologia GPCC – 1981-2010)
(*) área transparente: probabilidade < 40%

Previsão Climática de Temperatura Média – Janeiro/2026

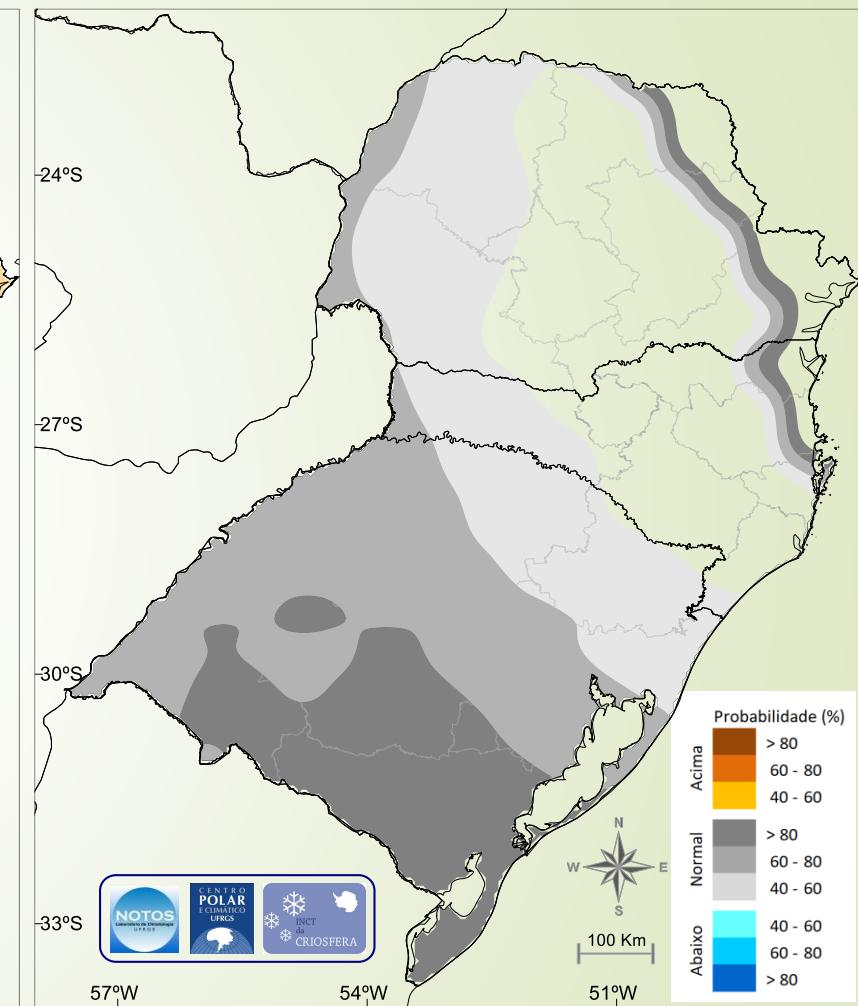

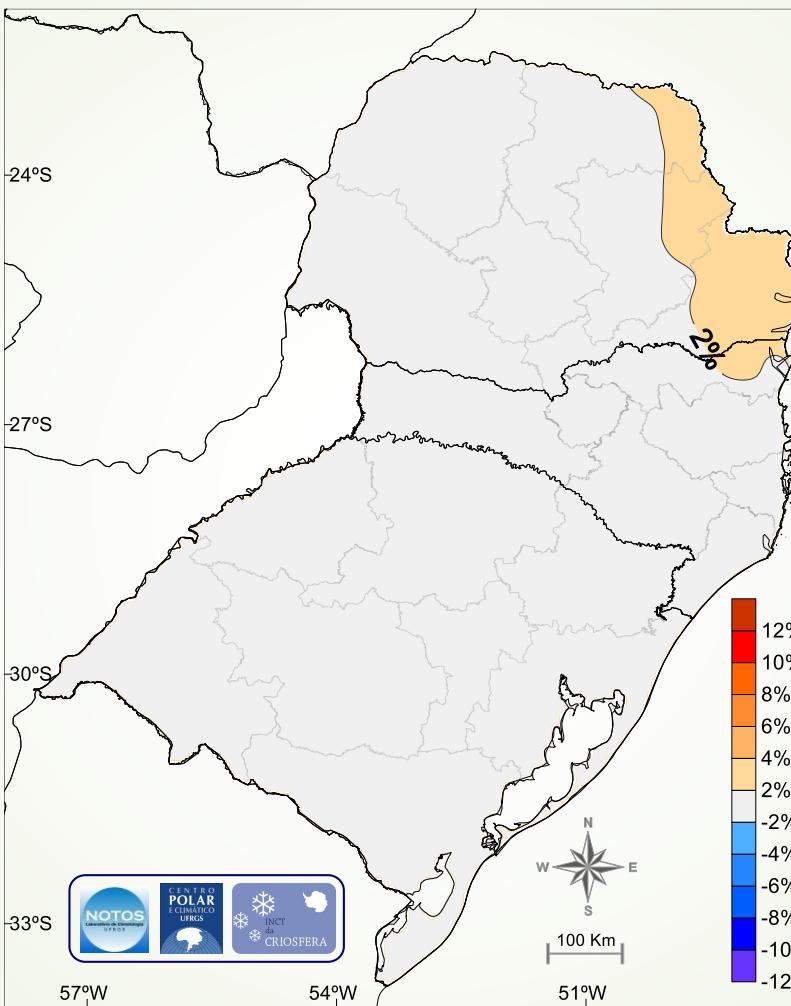

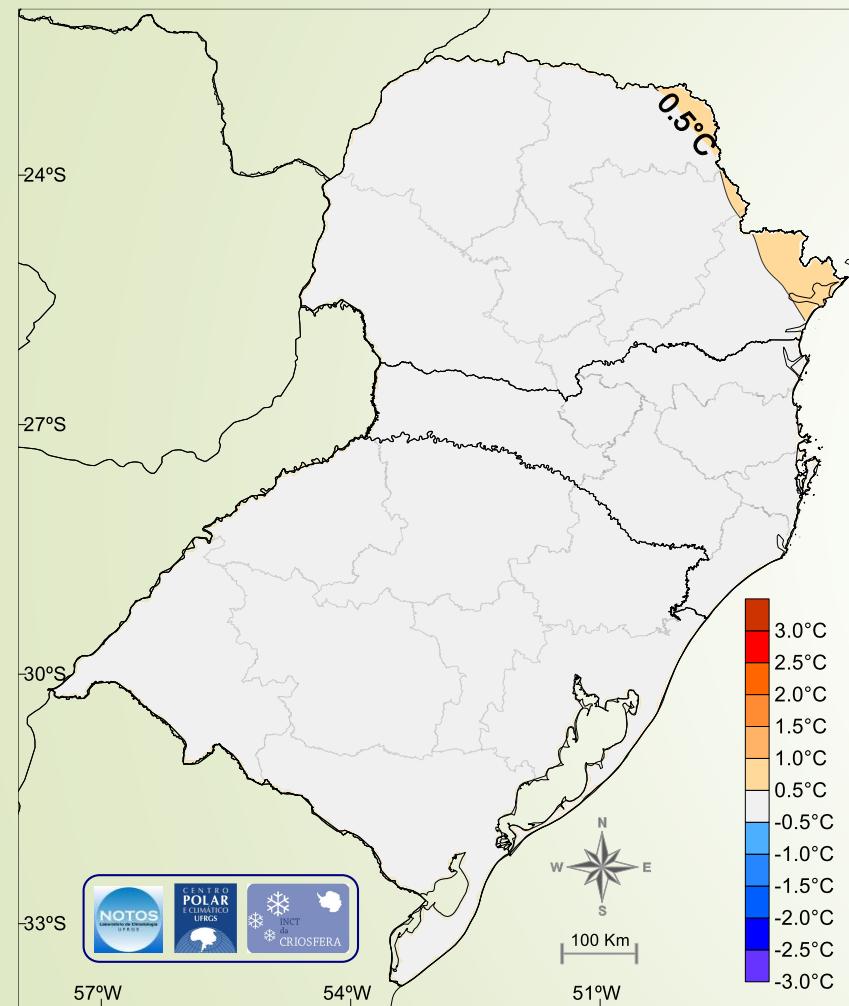

(*) área transparente: probabilidade < 40%

Previsão Climática de Temperatura Média – Fevereiro/2026

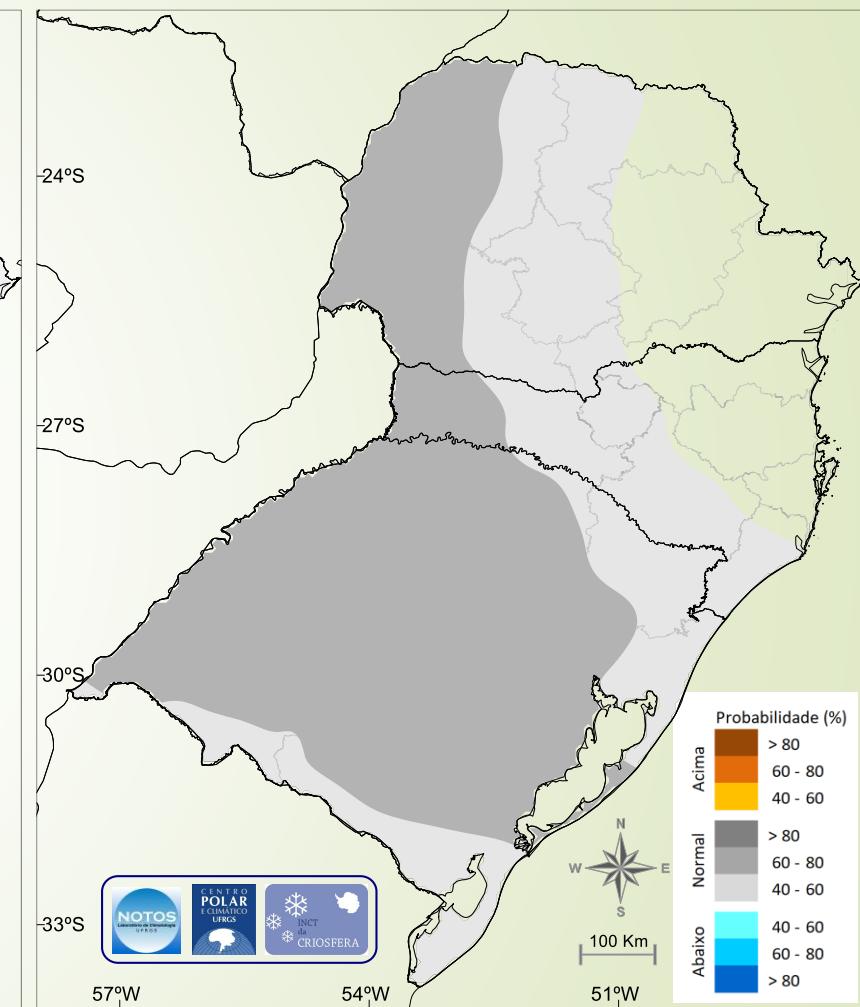

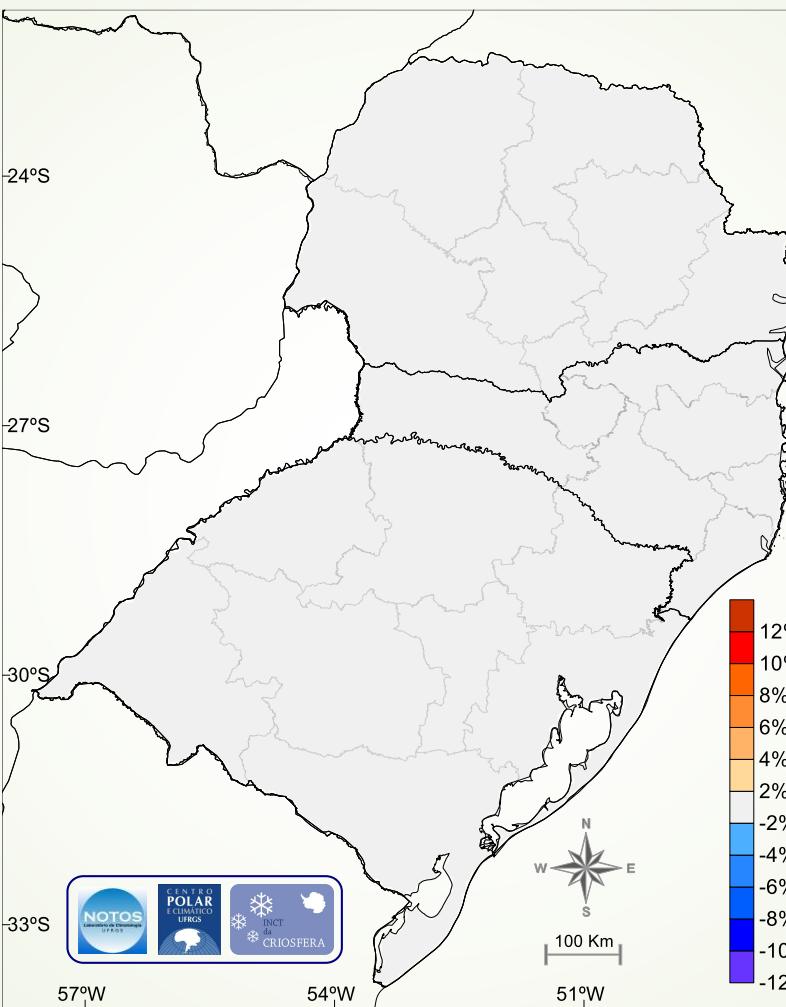

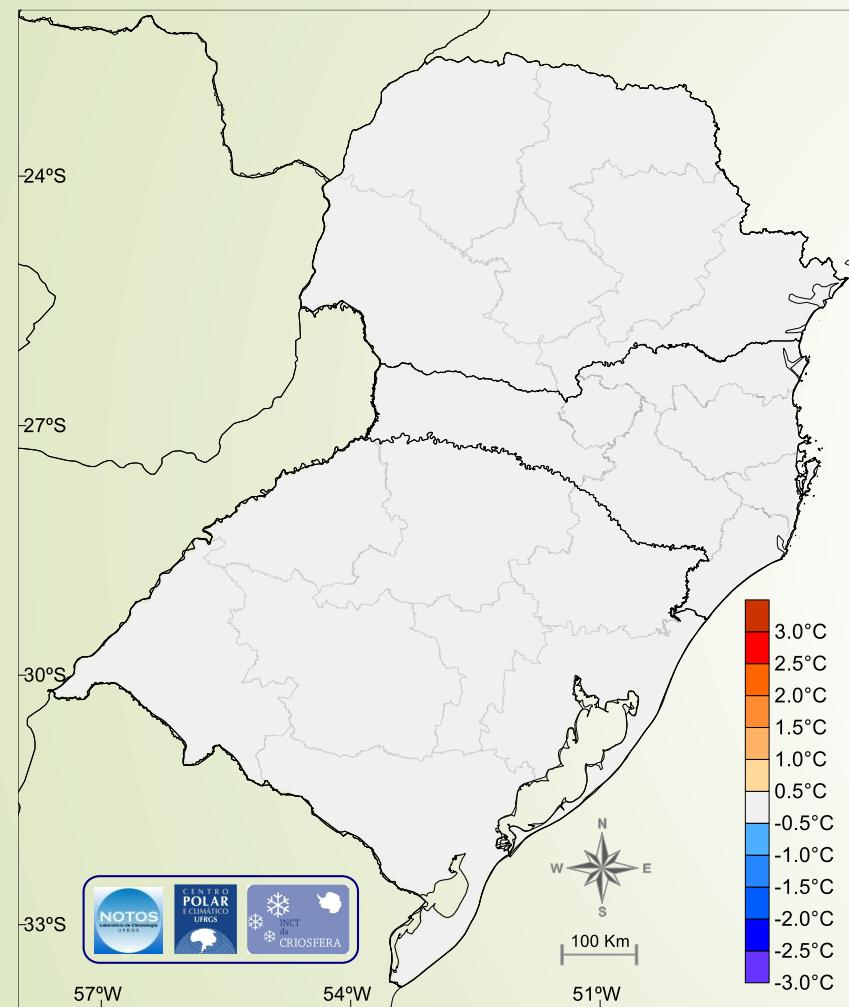

(*) área transparente: probabilidade < 40%

Previsão Climática de Temperatura Média – Março/2026

Previsão Climática de Temperatura Média – JFM/2026

(*) área transparente: probabilidade < 40%
